## PROFESSIONAL SUMMARY

First-year B.Sc Computer Science student building a career in Generative AI and LLM application development. Learning Python, Large Language Models, prompt engineering, RAG, embeddings, vector databases and AI agents, with hands-on experience in the Gemini and Claude APIs. Delivered a freelance React web application for a real client and deployed it on Netlify. Completed Manual and Automation Testing training at QSpiders. Seeking a GenAI internship to contribute to LLM-based applications and learn from real-world projects.

## TECHNICAL SKILLS

**Programming:** Python (beginner), JavaScript

**Generative AI:** Large Language Models (LLMs), Prompt Engineering, LLM Application Development

**LLM APIs:** Gemini API, Claude API

**GenAI Concepts:** Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, AI Agents, Tool-Based Workflows

**Frameworks:** LangChain, LangGraph (learning), React

**Web Development:** HTML, CSS, JavaScript, React, Netlify

**Databases:** SQL, PostgreSQL

**Testing:** Manual Testing, Automation Testing, Defect Reporting

## PROJECT EXPERIENCE

**Harini Vasthralayam – Freelance React Web Application**

*Technologies: React, JavaScript, HTML, CSS, Netlify*

- Developed a responsive website for a saree-business client based on their requirements.
- Built the user interface with React and reusable components, presenting products by category.
- Added interactive features using JavaScript and used AI-assisted development for coding and debugging.
- Tested the application, fixed issues, deployed it on Netlify and delivered the live website to the client.

## EDUCATION

**B.Sc Computer Science (1st Year)** 2026 – Present

*Bharathidasan University, Centre for Distance and Online Education*

**Intermediate** Completed May 2025

*Andhra Pradesh Open School Society (APOSS)*

**Secondary School Certificate (10th Standard)** Completed 2013

## TRAINING & CERTIFICATIONS

**Software Testing Training – QSpiders** Nov 2022 – Nov 2023

- Trained in Manual Testing and Automation Testing concepts and testing processes.
- Practiced identifying and reporting application defects with focus on software quality.

**GenAI Job Simulation – BCG X (Forage)** Oct 2026

- Completed a virtual job simulation by BCG X on the Forage platform and earned a Certificate of Completion.
- Practical tasks: data extraction and initial analysis, and developing an AI-powered financial chatbot.

## CURRENTLY LEARNING

Python for Generative AI, LLM application development, prompt engineering, Gemini and Claude API usage, RAG, embeddings and vector databases, LangChain, LangGraph, AI agents.
